

Free budget server with larger plans

What this is about

If you have a larger **Vintage Story** or **Minecraft** server (**12 GB of memory or more**), you can claim a **free Budget Series server** of the same game, for example a creative world, a test server, or a second community.

Claiming it

1. Go to **Services** and open your premium server.
2. Click **Claim Free Budget Server**.
3. Choose its options, then click **Claim free server**.

It's set up straight away and costs **\$0.00 while your premium service is active**. Both service pages show which servers are linked: "*Free server: ...*" and "*Free with: ...*".

How it's linked to your premium server

The free server follows your premium one:

If your premium server...	Your free server...
is suspended (unpaid)	is suspended too
is resized	is resized to match
drops below 12 GB (e.g. after a downgrade)	is suspended , but nothing is deleted
is cancelled	is cancelled and its data deleted

If your premium server...	Your free server...
changes game	stays on its original game

Cancelling your premium server also deletes your free server and everything on it.
Download anything you want to keep first.

- You get **one** free server per premium service.
- The free server can't be upgraded or change game, because it always mirrors your premium plan.
- Don't need it any more? Cancel it like any other service. You can claim it again later.
