

Ordering a server

1. Pick your game

On suhosting.net, scroll to the games or use **View All Games**, then pick yours. You'll see the plans for that game. Click **Configure Server** on the one you want.

Not sure how much memory you need? Start small. You can [upgrade](#) any time and only pay the difference.

2. Configure it

[Game Panel](#) [Client Dashboard](#) [Discord](#)

- **Billing cycle:** Monthly, Quarterly, Semi-Annually or Annually. Longer cycles are cheaper per month (the badge shows the saving).
- **Server Location:** choose the datacenter closest to you and your players. Each card shows your **live ping** to that location. Lower is better.

The **Order Summary** on the right shows what you'll pay today. Click **Checkout**.

3. Checkout

1. Have a **coupon** code? Enter it under **Coupon** and click **Apply**. Only one coupon per order.
2. Tick **I agree to the Terms of Service**.
3. Click **Checkout**. If you're not signed in yet, you'll be asked to sign in or create an account.
4. Pay the invoice with card (Stripe) or PayPal. See [Paying invoices](#).

Unpaid orders are cancelled after 7 days. If you change your mind, just don't pay. Nothing else to do.

4. Start playing

As soon as payment goes through, your server is created automatically. It usually takes a minute or two.

- In the billing site, it appears under **Services**. Click **Go to Server** to jump to it.
- In the [game panel](#), sign in with **Login with Paymenter** and your server is waiting.

Next: [Start here: a tour of the game panel](#).

Coupons and promotions

Current offers appear in the banner at the top of the site. Click the code to copy it. Most coupons apply to **your first invoice only**, and renewals are at the normal price.

Budget Series servers aren't eligible for coupons or partner codes.
