

Changing your game (Egg Changer)

Use the billing site to change game

Want to switch your server to a different game, or a different type of the same game (e.g. Minecraft Paper → Fabric)? **Do it from the billing site's Change Game button**, not from the game panel:

1. Go to suhosting.net → **Services** → your server.
2. Click **Change Game** and follow the steps.

Full guide: [Changing game](#).

Why not the Egg Changer in the panel?

The game panel's **Settings** tab has an **Egg Changer** card (in the panel, each game or server type is called an egg). It does switch the game, but the billing site doesn't find out.

Please don't use the panel's Egg Changer to change game. The billing site still thinks your server runs the old game and plan. If your server ever has to be rebuilt (for example during maintenance or a move), it's reinstalled with the **original game**, and your new game's files could be lost.

Change Game on the billing site keeps everything in sync. It also backs up your server first and puts you on the right plan for the new game.

Already used the Egg Changer?

[Open a ticket](#) and tell us which game your server runs now, and we'll update your service so it matches.
