

Command snippets and keyboard shortcuts

Command snippets

Tired of typing the same long console command? Save it as a **snippet** and insert it with a couple of keystrokes.

Creating a snippet

1. Go to **Account** → **Command Snippets** and click **Create**.
2. Give it a short **Name**, e.g. `announce-restart`.
3. Type the **Command**, e.g. `/announce Server restarting in 5 minutes!`
4. **Eggs**: pick which games it's for. Leave it **empty** to use it on every server.
5. Click **Create**.

The screenshot shows a dark-themed dialog box titled "Create Command Snippet" with a close button (X) in the top right corner. It contains three input fields: "Name" with the value "announce-restart", "Eggs" with a dropdown menu showing "Eggs", and "Command" with the value "/announce Server restarting in 5 minutes!". At the bottom, there are two buttons: "Create" (highlighted in blue) and "Close".

Create Command Snippet

Name *

announce-restart

Eggs

Eggs

Command *

/announce Server restarting in 5 minutes!

Create Close

Using a snippet

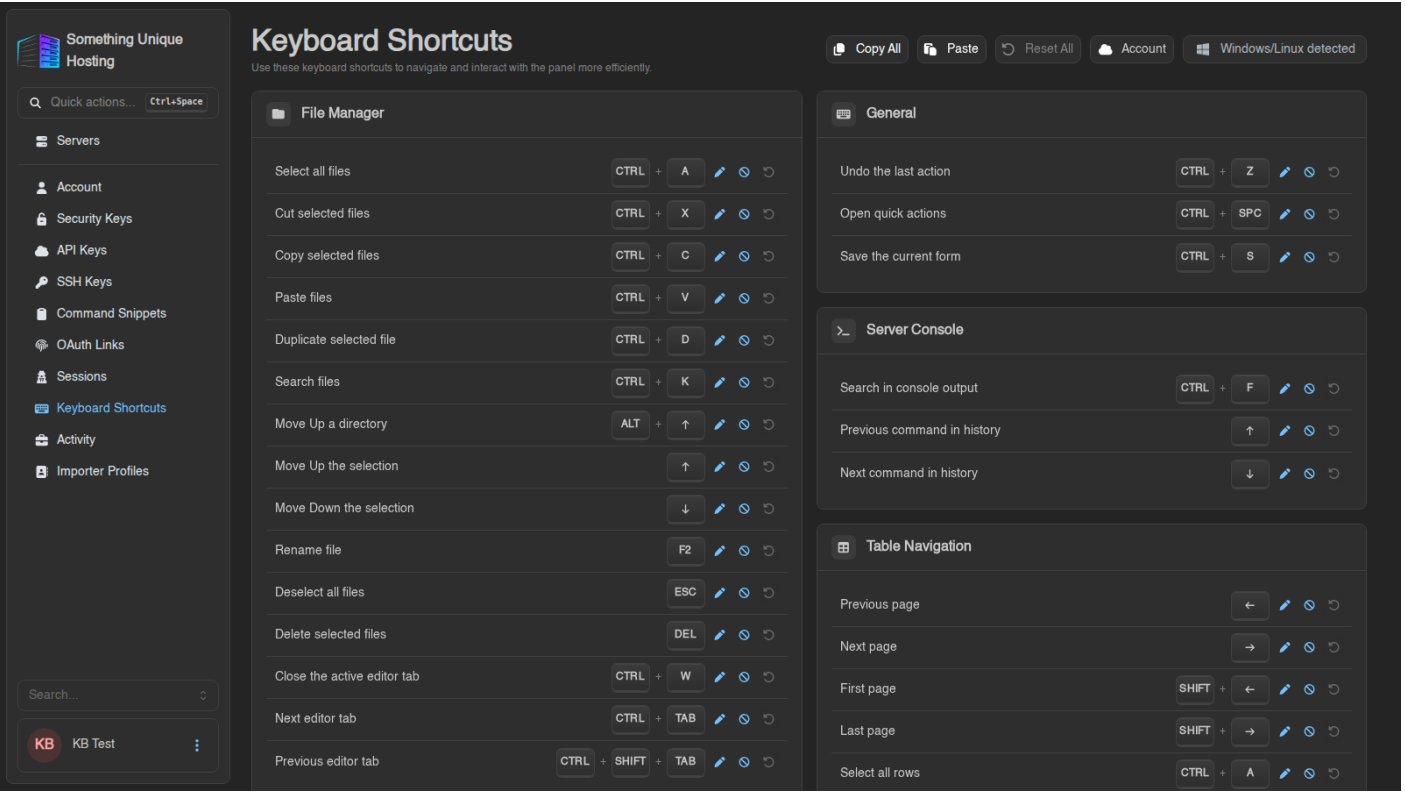

On any server's **Console**, type `!` followed by part of the name, e.g. `!ann`. Pick the snippet from the list and the command is filled in. Check it, then press **Enter** to send.

Handy Vintage Story snippets

Name	Command
<code>announce-restart</code>	<code>/announce Server restarting in 5 minutes!</code>
<code>day</code>	<code>/time set day</code>
<code>save</code>	<code>/autosavenow</code>
<code>backup</code>	<code>/genbackup</code>
<code>whitelist</code>	<code>/whitelist add</code> (then type the name)

Keyboard shortcuts

Account → **Keyboard Shortcuts** lists every shortcut. You can **Rebind** any of them, or turn them off.

The most useful ones (Windows/Linux; use **Cmd** instead of **Ctrl** on Mac):

Shortcut	Does
Ctrl+Space	Quick actions: jump to any page or action by typing
Ctrl+S	Save (files, settings)
Ctrl+K	Search files
F2	Rename the selected file
Ctrl+F	Search the console log
↑ / ↓	Previous commands in the console
Hold S + click	Select several servers on the server list

Shortcuts sync to your account. Use the menu at the top to keep changes on **Only This Device** instead.
