

Uploading files larger than 100MB

To upload files larger than 100MB you must use SFTP. If you do not have a SFTP program I recommend [WinSCP](#) or [Filezilla](#). Personally I prefer [WinSCP](#).

Once you have a SFTP program head to the game panel and into your server. Click the settings tab and then the "launch SFTP" button.

Once you click launch SFTP you should see a request to open the program you have installed. This will launch the program with the connection details filled out.

Open WinSCP: SFTP, F...and SCP client?

https://panel.suhosting.net wants to open this application.

Always allow panel.suhosting.net to open links of this type in the associated app

Open WinSCP: SFTP, FTP, WebDAV, S3 and SCP client

Cancel

Depending on your application and if this is your first time connecting you may see a message like this, accept it

Warning

Continue connecting to an unknown server and add its host key to a cache?

The host key is not cached for this server:
eu1.suhosting.net (port 2022)

You have no guarantee that the server is the computer you think it is.

The ssh-ed25519 key fingerprint is:
ssh-ed25519 255 wn73tOsR6wIVatLwTYgPhZCL+9H7YZSQtCiNhZkfsmk

If you trust this host, select Accept to add the key to WinSCP's cache and carry on connecting.
If you want to carry on connecting just once, without adding the key to the cache, select Connect Once.
If you do not trust this host, select Cancel to abandon the connection.

[Copy key fingerprints to clipboard](#)

Accept | Cancel | Help

After that you simply need to put in your password. This will be the same password as your game panel server password

Password – nopantsmcdance.ba518483@eu1.suhosting.net ✕
