

Your account: password, email and preferences

Getting to your account settings

Click your **name** in the bottom-left corner of the panel. The **Account** page opens, with the other account pages listed in the sidebar (Security Keys, API Keys, SSH Keys and so on).

The screenshot shows the 'Account' settings page. The left sidebar contains a search bar and a list of navigation items: Servers, Account (highlighted), Security Keys, API Keys, SSH Keys, Command Snippets, OAuth Links, Sessions, Keyboard Shortcuts, Activity, and Importer Profiles. The main content area is titled 'Account' and contains several sections:

- Password:** Fields for Current Password, New Password, and Confirm New Password, each with a toggle to show/hide the password. An 'Update' button is at the bottom.
- Email:** Fields for New Email and Current Password, each with a toggle to show/hide the password. An 'Update' button is at the bottom.
- Two-Factor Authentication:** A message stating 'No second factor is set up on your account yet.' and buttons for 'Setup Two-Factor' and 'Security Keys'.
- Password Login:** A message stating 'You can sign in with your password.' and a 'Disable' button.
- Account Details:** Fields for First Name (KB), Last Name (Test), Username (kb_test), and Language (English). An 'Update' button is at the bottom.
- Preferences:** Fields for Toast Position (Bottom Right) and two toggle options: 'Start on the Grouped Servers page' and 'Hide server addresses (best effort, for screen sharing)'.

The bottom-left corner shows a search bar and a list of server profiles, including 'KB' and 'KB Test'.

Signing in

Your game panel account is created automatically when you order a server. You can sign in with:

- **Login with Paymenteer:** one click, using your billing account.
- **Username or email** and your panel password.

- **Sign in with a Passkey**, once you've added one. See [Two-factor authentication and security keys](#).

Changing your password

In the **Password** card, enter your **Current Password**, then the **New Password** twice (at least 8 characters), and click **Update**.

The panel then asks whether to **log out every other session**. Say yes if you changed your password because you think someone else knows it.

Your panel password is also your [SFTP](#) password, so update your SFTP program too.

Forgot your password?

1. On the login page, click **Forgot Password** (under the username box).
2. Enter your email address and click **Request Password Reset**.
3. Open the email and follow the link. Enter your new password twice and click **Reset Password**.

No email? Check your spam folder, and make sure you used the address on your account. Still stuck? Open a ticket.

Changing your email

In the **Email** card, enter the **New Email** and your **Current Password**, then click **Update**. If a confirmation is needed, the panel says "*Confirmation link sent to ...*". Your address changes once you click the link in that email.

Account details

First Name, **Last Name**, **Username** and **Language**. Click **Update** to save.

Changing your **Username** also changes your SFTP username (`username.serverid`), so update your SFTP program afterwards.

Preferences

- **Toast Position:** where pop-up notifications appear on screen.
- **Start on the Grouped Servers page:** open your server groups instead of the full list after login.
- **Hide server addresses:** blurs IPs and ports. Handy when streaming or sharing your screen.

Avatar

Upload a picture in the **Avatar** card and click **Update**, or **Remove** to go back to your initials.

Other account pages

Page	What it's for	Guide
Security Keys	Passkeys and hardware keys	Two-factor & security keys
API Keys / Sessions / SSH Keys	Apps, logged-in devices, SFTP keys	Sessions, API keys and SSH keys
Command Snippets / Keyboard Shortcuts	Time-savers	Command snippets and shortcuts
OAuth Links	Shows that your account is linked to Paymentr	
Activity	Everything done with your account: logins, changes, API use	
Importer Profiles	Saved connections for the Importer
